ABOUT ME

My name is Mohamed Kamal Al-Bakly. I am an Egyptian Arab Muslim born on May 27, 2002. My academic journey in the field of computer science began in 2020 at El Shorouk Academy in Cairo, where I developed a keen interest in mathematics and its applications in computer science that contributes to automation and digital transformation. Since 2022, my focus has shifted towards artificial intelligence and data science. I am set to graduate in July.

My current project revolves around question-answer generation using generative AI. This project aims to leverage advanced AI techniques to create systems capable of generating meaningful and accurate responses to user queries. By utilizing natural language processing and machine learning algorithms, the project seeks to enhance the efficiency and effectiveness of automated question-answer systems, making them more intuitive and responsive to human interactions.

EDUCATION

El Shorouk Academy, Cairo   2020 - Present

Bachelor of Computer Science

Orange Digital Center   August 2022

Diploma in Artificial Intelligence and Data Science

TECHNICAL SKILLS

Programming Languages:

Python (advanced), Object-Oriented Programming (OOP)

Data Analysis Tools:

Exel , power Bi , sql , numpy, pandas, matplotlib

Data Science Skills:

Data literacy, data manipulation, exploratory data analysis (EDA), data visualization, data preprocessing, machine learning algorithms(scikit-learn) , model deployment in flask .

LANGUAGE PROFICIENCY

English

Upper-Intermediate Level
